Subject: response to letter dated January 29, 2013

Ms. Boyd,

I read the letter dated January 29, 2013 from Scott Elliott in response to my letter regarding the very significant sewer spill in Lake Wiley on January 17th and 18th of 2013. I wish to inform you that Joyce and I went to the site on January 19, 2013 and took pictures before I wrote the letter stating no lime had been applied. After reading Mr. Elliott's letter that the site had been cleaned and lime applied, we went to both sites January 29, 2013 and again took pictures. We also spoke with the homeowner at 1007 Palmyra and I wish to inform you that no lime has ever been applied to the ground at either site. I request that Mr. Elliott change his letter to reflect this for the records.

I would also like to inform you that we will have large amounts of rain again in the future and we are more interested in TCWS informing us of the improvements that will be made to prevent this occurring again when the rains come to Tega Cay once more. I remind you that rain caused the SSO at lift station #3 in 2006 also. The rate increases given to TCWS in 1999, 2006, and 2010 should cover these improvements.

I am including two pictures for each site for documentation. Thank you for addressing this matter.

Linda
